

Karstejn castle 2nd edition

Your price with VAT: 99 CZK

The cut-out model of this Gothic castle is made in 1:350 scale. The largest model of our firm so far is constructed and printed with the inclusion of the underlying rock, which can be improved using artificial grass and trees, which will aid to a more realistic model. Karlstejn castle was founded by Czech king and German emperor Charles IV. in 1348. In his absence, the cornerstone was laid by the archbishop Arnost z Pardubic. With its monumentality and beauty, the castle represented the paramount function of Charles's monarchy. The most important state acts, imperial crown jewels and a collection of holy relics were supposed to be kept here... The book contains: the baseplate with marked areas for the gluing of individual buildings and parts, detailed instruction including several instructive drawings, description of the castle's history and a plenty of photographs of both the real castle and the built
